

Grades 3 to 12

JSSPS/CTP/PO/GEN/041/20-21

6<sup>th</sup> September 2020

**Subject: Curiosity Board**

Dear parents,

Leaders and Innovators of JSS, the Innovation Committee has put up a challenge for you, to explore your skills and sharpen them. **Curiosity Board** is an online Activity in which you are allowed to pick a topic on which you have to find the best solution for their fictional country and send up to a minute long video entry explaining your solution.

**Grades 3-5**

**Situation 1: Climate Change**

Innovation is often cited as the solution to the challenges facing our planet - from the climate crisis to the unsustainable use of natural resources. The pandemic has highlighted just how fragile our systems are to major shocks, and how broken our relationship with nature truly is. As we begin to reflect and rebuild, innovation can help us solve many of the challenges that remain - but we need to be sure we embrace the right kind of innovation and we believe that innovation is key to solving many of the challenges facing our societies. As a responsible citizen and the face of the future, how do you intend to make that unique contribution to reduce the impact of Climate change?

**Situation 2: Education**

The Corona virus crisis has created education difficulties around the world. But the schooling crisis is even more severe in Africa, where up to 80 percent of students are unable to connect to the internet. Electricity is also sometimes not dependable, making distance learning difficult or even impossible. And, in normal times, schools often provide safety to children and offer services that their families cannot pay for. What are the steps that you would take to improve the Education Crisis?

**Situation 3: Wellbeing**

The Corona virus pandemic is having an impact on children around the world. Playing helps children stay physically and mentally well. It is an everyday part of a healthy and happy childhood. Play is just as

important during a crisis like the current Corona virus pandemic. It helps children manage their emotions and maintain a sense that everything is and can be fine. A great way for you to support the health, happiness and development of people during the current crisis is to find ways they can be healthy and happy. What are the ways you would like to suggest and recommend to the people in order to regain mental and physical health to fight back the crisis?

## **Grades 6-12**

### **Situation 1: Climate Change**

The Wolago Republic is the hotspot for factories regarding technological production for Laptops, Mobiles, Cars, etc as well one of the most crowded countries having a educated and technologically active population of 85 Million that depend on the above mentioned technologies. The overall effect of this situation has led to high carbon emissions which are soon to be catastrophic. As the President of **Wolago**, how do you aim to reduce its effect on the world before it is irreversible?

### **Situation 2: Education**

Education plays a major role in the development of a country in all areas - economic growth, prosperity, healthcare facilities, and technology. Secondary and University education has always been an issue in this country due to lack of adequate quality institutions and trained faculty. Only 3 out of 100 are able to enter a graduate course. Since the earthquake of 2018, the percentage of children attending primary school has dropped from 55% to 30%. As the President of the country of **Genovia**, what are the steps that you would take to improve educational facilities?

### **Situation 3: Well-being**

After the mental challenges undergone by people who had to self quarantine for months, according to a recent survey taken in the main region of **Dorsus** by Gen University, many have reported feeling sad more often, unproductively and extreme mood fluctuations in the worst case scenario. With the help of top class psychologists and medical staff of your nation, how do you aim to improve the country's well being?

Please follow the guidelines when submitting the videos:

1. Video to be in landscape mode.
2. Video Quality must be 720p or higher
3. Camera Shake should be avoided
4. Videos to be in .mp4 format

5. Ambient Noise to be reduced, the video must look professional
6. Introduce yourself at the start of the video.
7. Best 5 Entries to be compiled and shared on the school's social media.

Send your video entries to the email: [committeeofinnovation@gmail.com](mailto:committeeofinnovation@gmail.com) by September 17th and Final Entries to be compiled by 21st September.
