Subject: Flu Awareness - DHA

Dear Parents,

This is with regard to the latest circular from **Dubai Health Authority** about **Awareness of the Seasonal Flu.**

Seasonal influenza is a highly contagious respiratory illness caused by influenza viruses, which circulates the world affecting all age groups. Seasonal influenza lay serious burden on students health and academic achievement. The disease can be prevented by taking influenza vaccine every year. We encourage our school community to get the vaccine and keep in mind the general hygiene and cleaning protocols that are also valuable in breaking the chain of infection.

Kindly find below the links to brochures and guidelines from DHA in English and Arabic.
