

مدرسة جيه اس اس الخاصة JSS PRIVATE SCHOOL

Grades 5 to 12

JSSPS/CTP/PO/GEN/091/20-21
10th January 2021

Subject: KHDA Partner Activities for Schools

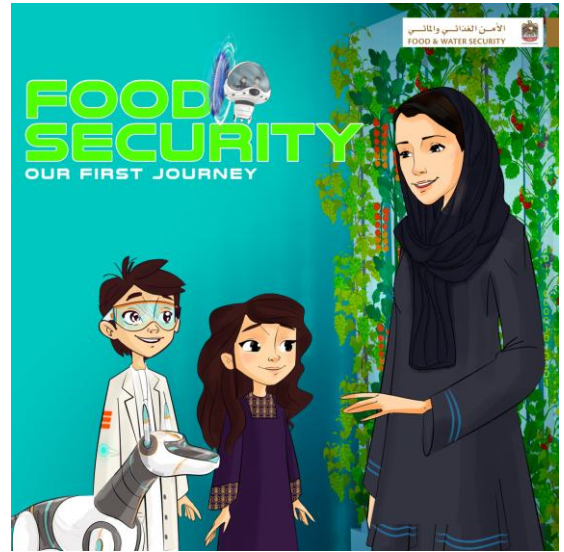

Dear Parents,
Greetings!

To inspire the youth to support future challenges by adopting technology in food security and agricultural production, and develop sustainable behaviors around food, The Food and Water Security Office has launched "Food Security - Our First Journey" – a resource for school students that outlines how to adopt technology in food security and agricultural production and develop sustainable behaviours around food. Additionally, a challenge for students will launch on January 13, 2021 to motivate them to adopt sustainable practices.

The Food and Water Security Office challenges you to design and build your own technology-enabled farm that addresses the UAE's unique agricultural challenges, either by drawing a picture or using the electronic platform Minecraft. From vertical farms to aeroponic gardens, your farm can take any shape you like. Just be sure to use your imagination and let our book, Food Security: Our First Journey, be your guide.

Please refer to the document in the link below and encourage your child to participate in the same.
