9) Please keep your child fruitfully engaged during the coming days. Setting a routine which involves yoga and exercise, frequent cleaning of hands, motivating him/her to help in household chores, regularly practicing of various subject skills via worksheets sent by the teachers and supervised usage of digital media, will go a long way in developing our JSSites into healthy, responsible and happy citizens of the world.

10) Teaching children positive preventive measures, talking with them about their fears, giving them a sense of control over situation will help. Please check the [Click here](#) to find information and guidance.
